# Heating and Cooling Rebates for Homes

**Program and incentive information for contractors.**

## Expand Your Residential Business Through Energy Efficiency

Con Edison is working in collaboration with local heating, cooling, and weatherization contractors to bring this energy saving program to our residential customers.\*

You'll be able to offer your customers valuable **rebates of up to \$1,000** on the purchase of qualified equipment and services.

\* Must be living in single family homes with one-to-four dwelling units.

### Con Edison's Heating and Cooling Rebates for Homes Include:

- Central air conditioners
- Furnaces
- Heat pumps
- Programmable thermostats
- Electric water heaters
- Duct and air sealing
- ECM furnace fans
- Water and steam boilers
- Indirect water heaters

### Who Should Participate:

- Electrical contractors
- HVAC contractors
- Plumbing contractors
- Weatherization contractors

Licensed contractors must meet all New York State and local municipality requirements.

### Benefits of High-efficiency Equipment

Educate your customers on the benefits of installing high-efficiency equipment:

- Valuable cash rebates for customers
- Reduced energy consumption by up to 30%\*
- Improved home comfort and air quality
- Protect the environment for future generations by becoming more energy-efficient
